

visitor or threat?

Your lobby is your first line of defense and your visitor's first impression. With increased threats, the traditional method of using a log book and generic visitor tags leaves you vulnerable. LobbyWorks™ is a simple and effective way to gain better control of your visitor traffic. With LobbyWorks, visitors are identified, potential threats are flagged, expected visitors are pre-authorized, badges are issued, sponsors are notified, and visitors are tracked while on the premises.

Honeywell's LobbyWorks is a powerful visitor management system that offers unprecedented control and enforcement of visitor security policies. It is an enterprise system that leverages your existing infrastructure to offer a flexible and open solution. It is a simple and effective method to strengthen your security, improve lobby effectiveness, and enhance service levels and professionalism.
