

elevated security

Let Honeywell's line of OmniAssure™ multi-technology readers take your security to a higher level.

OmniAssure contactless smart card readers are FIPS 201 compliant. They can deploy PIV II, TWIC, CAC and FRAC cards, while supporting existing proximity cards. What's more, their unique flash-on-card design allows you to support continually evolving government standards. So when it comes

to a complete identity and access control solution that complies with PIV II requirements now and in the future — we're already there.
