Preface
Purpose of this Document

Purpose of this Document

The Pro-Watch Software Suite Installation Guide provides the procedures and information necessary to install Release 3.81 of the Pro-Watch access control system. These procedures require a Microsoft Windows XP Professional, 2003, or 2008 Server operating system installed on the server and client machines.

Audience

This guide is written for the Pro-Watch system administrator who installs the Pro-Watch software on local machines.

Pro-Watch Documentation Set

The Pro-Watch Software Suite documentation set includes the following manuals:

- Pro-Watch Software Suite Guide (7-901071-J) in Portable Data File (PDF) format and as an Hypertext Markup Language (HTML) online help file accessed from the software.
- Pro-Watch Software Suite Quick Reference Guide in PDF format.
- Pro-Watch Software Suite Installation Guide (7-901073-C) in PDF format.

Use of Symbols

The following symbols appear in this guide:

Danger: Dangers provide information that you must follow to avoid the risk of physical injury.

Warning: Shock warnings provide information that you must follow to avoid physical injury by electrical shock.

Caution: Cautions provide information that you must follow to avoid damage to the hardware or software components of the system.

Note: Notes provide important information about a procedure or topic.

Tip: Tips provide information that maximizes the implementation of a feature.
Compliance

To obtain applicable EU compliance Declaration of Conformities for this product, please refer to our website, http://www.security.honeywell.com/hsce/international/index.html.

For any additional information regarding the compliance of this product to any EU-specific requirements, please contact:

Overview

This guide documents the installation of the Pro-Watch 3.81 software. Note that after you install this software, you will also need to complete the Pro-Watch licensing procedure documented in the Pro-Watch Software 3.81 Keys Guide, 800-01823.

Runtime Requirements

Pro-Watch (PW) Software Suite 3.81 requires:
- MDAC 2.8 SP1
- Microsoft .Net Framework 3.5 SP1 (32-bit required)
- Microsoft Windows Installer 4.5
- Microsoft Windows PowerShell 1.0

Pro-Watch Software Suite 3.81 also requires Microsoft SQL Server 2005 or 2008. If neither is installed, the Pro-Watch installation program will install Microsoft SQL Server 2008 Express for you. Note, however, that both the MS SQL x32 and x64 installation executables must be in the same folder as the Pro-Watch installation executable.

Caution: Ensure that these required components are present on the local system; if they are not, you must install them before continuing with the rest of the PW installation.

Note: The setup file and installation instructions in this guide are valid only for Pro-Watch Version 3.6 or greater. Pro-Watch Software Suite Release 3.7 must be already installed if you are upgrading to Release 3.81.

Supported Operating Systems

Pro-Watch 3.81 supports the following operating systems:
- Windows XP Professional - Service Pack 1 or greater. For Service Pack 2, you need to open certain ports in the Windows Firewall.
- Windows Vista
- Windows 7
- Windows 2003 Server - Service Pack 1 or greater. You need to open certain ports in the Windows Firewall.
- Windows 2008 Server - Service Pack 1 or greater.

Note: Pro-Watch 3.81 currently does not support Windows NT 4.0, Windows 2000 Server, or Windows XP Home.

Supported VMWare

Pro-Watch 3.81 supports VMWare ESXi version 4.0.0.
Installation Types

Below are the configuration options for installing a new instance of Pro-Watch as described in the section Installing Pro-Watch - Preliminary Steps on page 4.

- **Complete Pro-Watch Installation** – Installs all of the Pro-Watch components. Provides full server and client functionality.

- **Server-Only Pro-Watch Installation** – Installs only the Pro-Watch Server and configures the database.
  
  **Note:** Configuring the Pro-Watch database involves either installing a new database or upgrading a pre-existing database to function with this version of Pro-Watch.

- **Pro-Watch Client (Complete)** – Installs only the Pro-Watch client applications.

- **Pro-Watch Terminal Client** – Installs only the Pro-Watch client terminal application.

- **Pro-Watch Database Only** – Configures the Pro-Watch database.
  
  **Note:** Configuring the Pro-Watch database involves either installing a new database or upgrading a pre-existing database to function with this version of Pro-Watch.

- **Custom Pro-Watch Installation** – Allows the installation of Pro-Watch components custom selected from a list.
  
  **Note:** The Custom Pro-Watch Installation option should only be used by advanced users who understand what components of Pro-Watch are compatible with one another.

In addition to all the above types, there is also a process to **upgrade** an existing version of Pro-Watch. This is described separately in the section Upgrade Installation Process on page 27.
Installing Pro-Watch - Preliminary Steps

1. Double-click the **Pro-Watch Installation Wizard** icon to display the Pro-Watch Setup Wizard welcome page:

*Figure 1  Welcome Screen*
2. Click Next to display the Pro-Watch License Agreement screen:

Figure 2  License Agreement
3. Click the radio button to confirm agreement with the licensing terms and click **Next** to display the **Pro-Watch Configurations** screen:

*Figure 3  Configuration Options*

Select an Option Button

4. Select the appropriate **option button** to select one the available installation configuration choices described in the table below:

<table>
<thead>
<tr>
<th>Installation Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Complete Installation</strong> on page 8</td>
<td>Installs all of the Pro-Watch components and provides full server and client functionality. We recommend that you administer Pro-Watch from the same local machine.</td>
</tr>
<tr>
<td><strong>Server-Only Installation</strong> on page 13</td>
<td>Installs only the Pro-Watch Server and configures the Pro-Watch database.</td>
</tr>
<tr>
<td><strong>Client (Complete) Installation</strong> on page 15</td>
<td>Installs only the Pro-Watch client applications, the most common installation type when the server components are not needed.</td>
</tr>
<tr>
<td><strong>Terminal Client Installation</strong> on page 19</td>
<td>Installs only the Pro-Watch terminal client application. This configuration allows a user to use a local camera while using Pro-Watch through Remote Desktop or Microsoft Terminal Server Client.</td>
</tr>
</tbody>
</table>
5. After you select the desired configuration option, in the Select SQL Version field select the version that matches your version and click Next to display the first screen for the installation process you have chosen.

**Note:** To install Pro-Watch to a folder other than the default, click Browse and select an appropriate folder.
Complete Installation

1. Complete the Installing Pro-Watch - Preliminary Steps on page 4.

2. Select the Complete Pro-Watch Installation option button as explained in the section Select an Option Button on page 6.

Figure 4  Complete Installation Selection

3. Select from the drop-down list the SQL version running on your machine.

4. To change the installation path, click Browse to find and redefine the path.

5. Click Next to display the Configure Pro-Watch Server screen.

Note: If you do not have a version of SQL installed, the following message appears and SQL Express 2008 will be installed automatically. Click OK:
6. Select the Logon Type from the drop-down list.

7. Enter your user name.

8. Select the Domain Name from the drop-down list.
9. Enter the correct **Password** and click **Next** to display the **Configure Pro-Watch Database** screen.

*Figure 6  Configure Pro-Watch Database (Manual) Screen*

![Configure Pro-Watch Database Screen](image)

**Note:** When you select SQL Express 2008 as your database, Pro-Watch displays a DOS dialog box while the SQL DB is downloaded. Allow 5 to 10 minutes for the DOS dialog box to display and do not close it before your system finishes with downloading the SQL DB.

10. For manual configuration, select the **Manually Configure Database (Advanced Users Only)** check box, then type in the Database Server name and select the Instance Name (that is, the Pro-Watch Database name) from the drop-down list. If the SQL server you want to use is not in the list, type its name manually. When you have completed this configuration screen, go to Step 8.

**Caution:** Manual configuration is recommended only for advanced users.
11. To use the local database server on your machine, select the **Use Local Database Server** check box. This selection disables the Database Server field, so you must either type in a new database name or select a local database from the **Instance Name** drop-down list.

**Note:** The name you enter for the service account at initial login is the account name that will enable you to log in to Pro-Watch.

*Figure 7  Pro-Watch Database (Local) Screen*
12. Click Next to display the continuation of the Configure Pro-Watch Database screen where you can create a new database.

**Figure 8  Create New Database Screen**

13. To configure an existing database, leave the check box blank and select a Pro-Watch Database Name from the drop-down list

OR

Select the check box and type in the name of the new database that you’re creating.

14. Click Next to display the Ready to Install the Program screen and go to Installing Pro-Watch - Final Steps on page 24 to finish the installation process.
Server-Only Installation

The server-only installations do not include any client components.

1. Complete the Installing Pro-Watch - Preliminary Steps on page 4.

2. Select the Server-Only Pro-Watch Installation option button as explained in the section Select an Option Button on page 6.

Figure 9  Server-Only Selection

3. Select from the drop-down list the SQL version running on your machine.

   Note: When you select SQL Express 2008 as your database, Pro-Watch displays a DOS dialog box while the SQL DB is downloaded. Allow 5 to 10 minutes for the DOS dialog box to display and do not close it before your system finishes with downloading the SQL DB.

4. To change the installation path, click Browse to find and redefine the path.

   Click Next to display the Configure Pro-Watch Server screen (Figure 5).

   Note: If you do not have a version of SQL installed, the following message appears and SQL Express 2008 will be installed automatically. Click OK.
5. Enter the requested information and click Next to display the Configure Pro-Watch Database screen (Figure 6).

6. For manual configuration, select the Manually Configure Database (Advanced Users Only) check box (see Figure 6). Select a Database Server from the drop-down list and enter the Pro-Watch Database Name. If the SQL server you want to use is not in the list, type its name manually.

   **Caution:** Manual configuration is recommended only for the advanced users.

7. To use the local database server on your machine, select the Use Local Database Server check box. This selection disables the Database Server field, so you must either type in a new database name or select a local database from the Instance Name drop-down list. (See Figure 7.)

8. Click Next to display the continuation of the Configure Pro-Watch Database screen (Figure 8).

9. To configure an existing database, leave the check box blank and select a Pro-Watch Database Name from the drop-down list

   OR

   Select the check box and type in the name of the new database you’re creating.

10. Click Next to display the Ready to Install the Program screen and go to Installing Pro-Watch - Final Steps on page 24 to finish the installation process.
Client (Complete) Installation

All Client installations include the following components:

- Alarm Monitor.
- Badge Builder.
- Map Builder.
- Registry Manager.
- Reports.
- Pro-Watch Client Application.

1. Complete the Installing Pro-Watch - Preliminary Steps on page 4.

2. Select the Pro-Watch Client (Complete) option button as explained in the section Select an Option Button on page 6.

Figure 10  Client (Complete) Selection
3. Click **Next** to display the **Configure Pro-Watch Client** screen:

   **Figure 11  Configure Pro-Watch Client Screen**

   ![Configure Pro-Watch Client Screen](image)

4. For automatic configuration, select a **Pro-Watch Server** from the drop-down list. Click **Refresh** to refresh the server list. Pro-Watch populates the associated **Database Server** name and the **Pro-Watch Database Name** in their respective fields.

   **Note:** If the server you want to connect to is not in the list, or if the Pro-Watch Server is not currently running on this server, you must either start it or use the manual configuration.

5. For manual configuration, select the **Manually Configure Pro-Watch Client (Advanced Users Only)** check box. Select a **Database Server** from the drop-down list and enter the **Pro-Watch Database Name**. If the server you want to use is not in the list, type its name manually.

   **Caution:** Manual configuration is recommended only for advanced users.

6. Click **Next** to display the **Ready to Install the Program** screen and go to **Installing Pro-Watch - Final Steps** on page 24 to finish the installation process.

   **Note:** If the program displays the following error message during installation, be sure the Named Pipes and TCP/IP protocols are enabled in the SQL Server Network Configuration:
7. Run the SQL Server Configuration Manager.

8. Select SQL Server Network Configuration > Protocols for SQLEXPRESS to display the protocols.
9. Click the Named Pipes and TCP/IP protocols to display their properties, and use the dropdown list to set the Enabled property to Yes.

10. Stop, and then restart, the MS SQL service to activate your changes.
Terminal Client Installation

1. Complete the Installing Pro-Watch - Preliminary Steps on page 4.

2. Select the Pro-Watch Terminal Client option button as explained in the section Select an Option Button on page 6.

3. Click Next to display the Ready to Install the Program screen and go to Installing Pro-Watch - Final Steps on page 24 to finish the installation process.
Database Only Installation

1. Complete the Installing Pro-Watch - Preliminary Steps on page 4.

2. Select the Pro-Watch Database Only option button as explained in the section Select an Option Button on page 6.

Figure 13   Database Only Selection

3. In the Select SQL Version field, select the desired version of Microsoft SQL.

4. Click Next to display the Configure Pro-Watch Database screen (Figure 6).

   Note: When you select SQL Express 2008 as your database, Pro-Watch displays a DOS dialog box while the SQL DB is downloaded. Allow 5 to 10 minutes for the DOS dialog box to display and do not close it before your system finishes with downloading the SQL DB.

5. For manual configuration, select the Manually Configure Database (Advanced Users Only) check box, then type in the Database Server name and select the Instance Name (that is, the Pro-Watch Database name) from the drop-down list. If the SQL server you want to use is not in the list, type its name manually.

   Caution: Manual configuration is recommended only for the advanced users.

6. To use the local database server on your machine, select the Use Local Database Server check box. (See Figure 7.) This selection disables the Database Server field, so you must either type in a new database name or select a local database from the Instance Name drop-down list.
7. Click **Next** to display the continuation of the **Configure Pro-Watch Database** screen *(Figure 8).*

8. To configure an existing database, leave the check box blank and select a Pro-Watch Database Name from the drop-down list

   OR

   To configure a new database, select the check box and type in the name of the new database. To install the new Pro-Watch database to a folder on the SQL server other than the default one, click **Browse** and select a new path.

9. Click **Next** to display the **Ready to Install the Program** screen. and go to **Installing Pro-Watch - Final Steps** on page 24 to finish the installation process.
Custom Installation

During both the server and client installations, both the client and server components can be customized. The custom setup option enables you to install only a selected subset of the client and server components.

1. Complete the Installing Pro-Watch - Preliminary Steps on page 4.
2. Select the Custom Pro-Watch Installation option button explained in the section Select an Option Button on page 6.

Figure 14 Custom Installation Selection

3. Select from the drop-down list the SQL version running on your machine.

Note: When you select SQL Express 2008 as your database, Pro-Watch displays a DOS dialog box while the SQL DB is downloaded. Allow 5 to 10 minutes for the DOS dialog box to display and do not close it before your system finishes with downloading the SQL DB.

4. To change the installation path, click Browse to find and redefine the path.
5. Click **Next** to display the **Pro-Watch Custom Installation Options** screen.

*Figure 15  Custom Installation Options*

![Pro-Watch Custom Installation Options](image)

6. In this step you choose which components to install. To modify how a component is installed, click on the icon for that component to view the choices.

*Figure 16  Feature Installation Options*

![Feature Installation Options](image)

7. Review the components and select the ones you want to install, and click **Next**.

8. The order of the remaining screens depends on your choices of components to install. If you want to install a server (that is, you did not X it out), perform the steps listed in **Complete Installation** on page 8. If you do not want to install a server, mark it as unavailable to be installed and click **Next** to display the **Configure Pro-Watch Client** screen (*Figure 11*). Perform the steps in **Client (Complete) Installation** on page 15 for the rest of the procedure.

9. Go to **Installing Pro-Watch - Final Steps** on page 24.
Installing Pro-Watch - Final Steps

1. The final steps begin on the Ready to Install the Program screen:

   Figure 17    Ready to Install Pro-Watch screen

2. Click Install to display a status bar showing the progress of the installation.
The process takes several minutes.

3. When the installation process is finished, click **Next** to display the **InstallShield Wizard Complete** screen.

4. Click **Finish**. A small pop-up informs you that you have to reboot the PC for the installation to take effect.
5. Click **OK** to restart your computer.
Upgrade Installation Process

Pro-Watch Software Suite Release 3.81 must be already installed before you begin this procedure.

1. Before you begin to install the patch, close out any Pro-Watch software that may be running.

2. Copy the patch executable onto your machine.

3. Double-click on the executable to display the Pro-Watch Setup Wizard Welcome screen.

*Figure 21 Welcome Screen*
4. Click **Next** to display the **Start Installation** screen.

   *Figure 22  Start Patch Installation Screen*

   ![Start Patch Installation Screen](image)

   If you are installing Pro-Watch Server, select the **Apply Update to Database** checkbox (if you are installing Pro-Watch Client, the checkbox is greyed out).

5. Click **Next** to display the **Installing** screen.

   *Figure 23  Installing Patch Screen*

   ![Installing Patch Screen](image)

   The status bars display the progress of the installation.
6. When the installation is complete, the software automatically displays the message that the installation is successful.

*Figure 24  Successful Installation Message*

7. Click **Finish**. A small pop-up informs you that you have to reboot the PC for the patch to take effect.

*Figure 25  Reboot Prompt*

8. Click **OK** to restart your computer.
