

## Getting Started...

### Pro-Watch Software Suite 4.2 Web Media Set

---

#### Overview

This Pro-Watch Software Suite 4.2 Web Media Set includes the Pro-Watch Software Suite 4.2 Web installation software and documentation. Please refer to the *Pro-Watch Software Suite Installation Guide (7-901071V5)* in the **Documentation** sub-folder in Disk 2 folder of the Pro-Watch media set for installation instructions.

**NOTE: The noun “disk” in this document refers to a software folder saved on the media set DVD and NOT a physical disk.**

#### Installation Preparation

In addition to this media set, you will need to purchase a Pro-Watch license key (see *Pro-Watch Software Keys User Guide, 800-08123V5*), and install the following prerequisite software located in the **Prerequisites** sub-folder inside the Disk 2 folder of the Pro-Watch media set.

- Microsoft .NET Framework 4.5.
- Microsoft Windows Power Shell 1.0 (only for MS SQL Express installations not using Microsoft Windows 7).

**Before you install:** If you purchased a Pro-Watch license key, you still must take further steps to obtain the key. Be sure to read the *Pro-Watch Software Keys User Guide (800-08123V5)* included on your Pro-Watch installation CD. You will need to follow the steps in this document to receive a Software Keys License from the Software Keys Voucher Manager. Install the Software License on the machine using the Software Keys License Manager after installing Pro-Watch.

#### Installation Notes

- If you are upgrading an existing Pro-Watch installation that is Release 3.6 or earlier, use the database upgrade scripts found in the **Scripts > PW Upgrade Scripts** sub-folder in Disk 2 folder of the Pro-Watch media set to update the server.
- Install the Pro-Watch software found in the **Pro-Watch Installation** sub-folder in Disk 1 folder of the Pro-Watch media set. Inside that sub-folder, you will find two programs; **New Install** and **Update Install**. The Update Install program can be applied on top of any Pro-Watch 4.1 or later build. The Installation Guide (*7-901073V5*) is found in the **Documentation** sub-folder in Disk 2 folder. The Pro-Watch 4.2 Web Release Notes (800-08211V33) are found in the **Release Notes** sub-folder in Disk 1 folder.
- If you are running either Pro-Watch Lite Edition (PWLTE) or Pro-Watch Professional Edition (PWPE), set up a backup script per the instructions in the **Scripts > Backup Script** sub-folder in

Disk 2 folder of the Pro-Watch media set. This is necessary, because Microsoft does not allow the SQL Server Agent to be used in conjunction with SQL 2008 Express.

## Pro-Watch Software Suite 4.2 Web Media Set Contents

**Note:** The columns in the following table refer to three software folders and NOT to physical disks.

**Table 1: Disk 1 Folders**

TOP FOLDER	2nd Level Sub-Folder	3rd Level Sub-Folder
